## Solar Motion Sensor Light

- 1) Expansion Pillar-Hinge
- 2) Hole
- 3) Screw
- 4) Solar Panel
- 5) PIR Motion Sensor
- 6) On / Off Button
- 7) LED Panel Light

## Specifications:

Solar Panel: 0.55W, 17% Efficiency

Battery: 3.7V 800mAh

Daylight Sensor: <10 Lux

Motion Detector

Angle: 120°

Distance: 3m

Weight: 128g

Dimensions: 95(W) x 124(H) x 48(D)mm

## Features:

- PIR Motion Sensor and Night Sensor
- Recharges via Solar Panel
- 12 Hours Lighting from One Day of Charge
- Waterproof, heatproof and durable - IP44 Rated
- Built-In Energy Saving

## Operation Instructions:

### 1. Unlock and Activate the Solar Light

The internal battery is locked at the factory for safe shipment. Press the “on/off” button to unlock the battery and lighting system.

### 2. Install Device

Please use the supplied expansion pillar-hinge and screws to mount the device on a pole or wall.

### 3. Charging Via Solar Panel

Please install the unit facing south and make sure the solar panel can get sunlight directly without any obstructions. The device will fully charge in one day under ideal bright sunlight.

### 4. Night Sensor Function

Device will automatically turn on when motion is detected in darkness or at night, and automatically turn off during daytime or in a bright area.

## Warning:

- Keep the device away from fire, water and moist places in order to avoid damage.
- Any sever shock to the charger is not recommended.
- Only a professional technician should attempt to disassemble the charger in order to avoid damaging the device.

**Please Note:**

1. Please fully charge the device before first use.
  2. If there is no good sunlight in months, the battery may run completely flat and will need to be recharged via bright sunlight. Once fully charge please unlock the device and lighting system to prevent damage.
  3. If the light blinks this means the power is very low. You must charge the device via sunlight or it will stop working.
  4. If there is no good sunlight it may take longer to fully charge the device.
