

POWERTECH Lithium

LiFePO4 batteries have UP TO 10 times the battery cycle life over Lead-Acid. This is the real secret to them. They are so much more RELIABLE than Lead-Acid. It means that you can install them in the bowels of a cruiser and forget about them. Or upgrade to battery power standby on your Solar Power installation. These are straight forward replacement for most lead acid batteries

Benefits

- Total cost of lifetime ownership is, in fact, substantially reduced.
- LiFePO4 batteries will deliver TWICE as much current under load as a Lead-Acid equivalent. Importantly, they will also take a far higher charge current so you are back up to full capacity in no time!
- LiFePO4 batteries weight about 1/2 as much as equivalent Lead-Acid installations. This weight saving can improve boat or vehicle performance.
- LiFePO4 batteries do not produce dangerous (explosive) hydrogen gas.
- No external safety relay is needed.

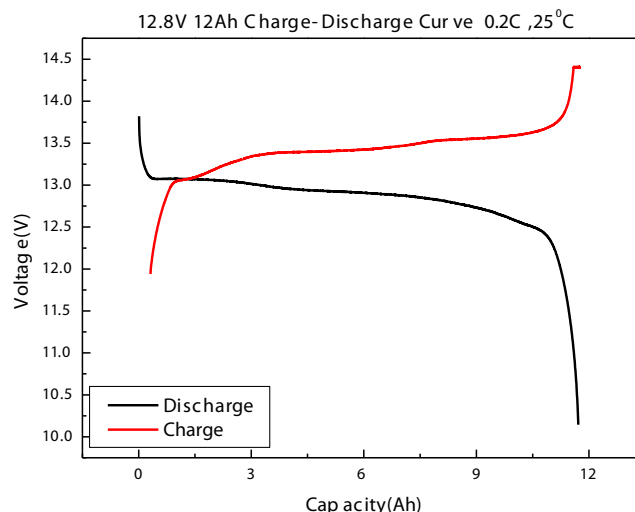

Product Specifications

Product Model	SB2211
Normal Voltage	12.8V
Rated Capacity	12±1Ah (At 0.2C discharge rate)
Battery Energy Capacity	153.6Wh
Internal Resistance	≤220m Ω
Charge Voltage	14.6V
Standard Cutoff Voltage	9.2V
Recommended Charge Current	≤12A
Discharge Current	12A
Peak Discharge Current	≤20A (5 sec)
Passive Protection Function	Over charge protection, Over discharge protection, Temperature protection, Balanced function
Battery Terminal	T1
Weight	1.5±0.1kg
Size	151(L) x 99(W) x 95(H)mm

WARRANTY

Characteristics Curve

Caution

- Do not short terminals or reverse polarity
- Do not disassemble or modify battery
- Keep battery out of reach of children
- Do not expose to temperatures over 60°C
- Not suitable for vehicle starting applications

Charge battery every 6 months or when voltage drops below 12.8V.
